MEMORANDUM

To: Jeff Cown

From: Gurdial Singh

Subject: Fulton County - City of Atlanta Gun Club Road, MSWL

Reference: Request by K.C. Marks, Assistant Director, Solid Waste Services, City of Atlanta for a meeting.

A meeting was held in our office on February 14, 2000 to discuss the discrepancies listed in the EPD letter of January 5, 2000. The following person were present in the meeting:

K. C. Marks, Assistant Director, Solid Waste Services, City of Atlanta
James Swope, Manager, Disposal Services, City of Atlanta
Richard Woodham, P.E., Roy F. Weston, Inc.
Christy Easter, EPD
Gurdial Singh, EPD

The items listed in the letter of January 5, 2000 were discussed. Ms. Easter recommended that GWC-8&9 be installed in the unfilled area between the permitted landfill and the buried waste in the southeast corner (waste in this area was placed prior to the disposal in the permitted area). Mr. Marks stated that the limits of the buried waste extends beyond the landfill property. Presently city is negotiating with the owner for the purchase of this property. He requested that if possible the closure certificate for the permitted landfill be given once all the other items are addressed. The area of the buried waste can be shown in the as-built drawings of the construction certification report, but monitoring wells beyond the landfill property can only be proposed or constructed after the purchase of that land. I stated that closure for the permitted landfill area may be possible but I need to discuss this matter with my supervisor before we can give him a final answer.

Mr. Woodham stated that he will send us the requested revisions of the construction certification report in the near future.
