Re: Gun Club Road Municipal Solid Waste Landfill, Permit No. 060-026D (SL)  
Revised Certification Statement

Dear Mr. Singh,

As per our phone conversation, Roy F. Weston, Inc. (WESTON) has enclosed 4 copies of the revised certification statement for Gun Club Road landfill. The certification statement now includes language stating that the un-permitted area of waste, which is within the southeast area of the existing property boundary shown on the as-built drawing is not included in this certification.

Please incorporate this revised statement into the certification report sent to you in June 1998 in order to update this document. WESTON will send a copy of this to you by fax and will follow with originals by federal express for your review.

Please contact me if you have any questions about the above information.

Sincerely,  
ROY F. WESTON, INC.

Richard A. Woodham, P.E.  
Certifying Engineer

## SECTION 5

### CERTIFICATION

**Certification for Final Closure for the City of Atlanta**  
**Subject Facility: Gun Club Road Municipal Solid Waste Landfill**  
**Permit Number: 060-026D**

Copies Attached in this Certification Report:

1. Property deeds amended to reflect the notice of landfill operations (forth coming from the City of Atlanta), an accurate legal description of the landfill facility boundary, a description of the type of solid waste, which has been deposited into the landfill.
2. Copy of the letter stating when the last load of waste was received (Appendix A).
3. EPD closure checklist completed by WESTON (Appendix A).
4. Final cover system is acceptable based on results of in place testing for the 12-inch bridging layer and the 18-inch infiltration layer, which meets the maximum allowable permeability of  $1.0 \times 10^{-5}$  cm/sec. (Appendices D and E respectively).
5. A final as built survey performed by a professional surveyor registered in the State of Georgia showing final contours, features and limits of refuse boundaries as per the area identified with in the approved Closure/Post Closure Care Plan, revised October 1996.
6. This certification is specific to the permitted area of waste shown on the approved Closure/Post Closure Care Plan dated October 1996 and does not include the area of waste located in the southeast portion of the property outside of a line generally from methane monitoring probes MM-8R and MM-9R.

Based on the above information and periodic site visits, and sound engineering judgement, I hereby certify that the Gun Club Road Landfill has been closed in accordance with the closure requirements set forth in chapter 391-3.4.11 of the Solid Waste Regulations.
