Honorable Shirley Franklin, Mayor
City of Atlanta
55 Trinity Street
Atlanta, Georgia 30335

SUBJECT: Gun Club Road - Permit Number 060-026D(SL)
Municipal Solid Waste Landfill

Dear Mayor Franklin:

The Georgia Environmental Protection Division (EPD) is in receipt of April 2006 methane monitoring results. Please be reminded the methane monitoring system for the subject facility is currently out of compliance. MM-9R was abandoned, but replacement wells MM-11 and MM-9 have never been approved by EPD, as data from these wells do not demonstrate compliance at the property boundary south of MM-9, as required. As you were previously notified, additional monitoring must be established to the south of the waste mass. Methane monitoring should also be established to the east of the site to demonstrate methane is not migrating offsite in this direction as well. These wells must be incorporated into the approved methane monitoring system.

The City should submit a minor modification request within 60 days ^{July 11} to address the required modifications to the methane monitoring system. Failure to do so will be considered a Violation of the Rules of Solid Waste Management. Should you have any questions, please contact me at 404-362-2559.

Sincerely,

Christy Kehn-Lewis
Geologist III
